Hisaab for Alexa+ — 3-Minute Video Demo Script

Official Hackathon Teleprompter & Recording Guide | Target Duration: 180 Seconds

[0:00 - 0:25] Scene 1: The Hook & The Problem

[ON SCREEN]: *Full desktop view of http://localhost:8000/ showing the hisaab.ai Amazon smile logo, Executive HUD, and glowing 3D Echo Ring.*

"Hello judges! In millions of households across India and emerging markets, managing domestic help—like maids, cooks, drivers, and dhobis—is an awkward verbal negotiation. Every month ends with forgotten absences, disputed advances, and uncomfortable salary confrontations."

"Most expense apps fail because nobody wants to open an app and type every morning."

"This is **Hisaab**—an ambient, voice-first household ledger and Amazon Pay hub built natively for Alexa+ over the open MCP standard."

[0:25 - 1:10] Scene 2: Zero-Friction Voice Logging & Domestic Micro-Services

[ON SCREEN]: *Click the glowing 3D Echo Ring (or speak hands-free). Watch the ring turn cyan with procedural chimes.*

"Hisaab is present-by-default. You never log daily attendance—only verbal exceptions."

■■ **YOU SPEAK:** *"Alexa, gave 12 clothes to the dhobi today."*

■ **ALEXA REPLIES: "Logged 12 clothes for Ramlal Dhobi at 5 rupees per piece (Rs. 60). Running balance now 120 rupees."**

[0:45 - 1:10] Scene 2 (Cont.): Damage Penalties & Flatmate Splitter

[ON SCREEN]: *Stay on main console, watch live speech transcript strip update in real-time.*

"It automatically manages running tabs for piece-rate ironing. And when unexpected accidents happen at home..."

■■ **YOU SPEAK:** *"Alexa, deduct 50 rupees from Ramesh for the broken glass."*

■ **ALEXA REPLIES: "Deducted 50 rupees from Ramesh for broken glass. Remaining balance now -1,050 rupees."**

[0:55 - 1:10] Scene 2 (Cont.): Flatmate / PG Roommate Bill Splitter

[ON SCREEN]: *Point cursor to prompt explorer or speak directly.*

"Penalties are recorded transparently without resentment, itemized on the final receipt. And for flatmates sharing expenses..."

■■ **YOU SPEAK:** *"Alexa, split the maid's 4,000 bill with Amit."*

■ **ALEXA REPLIES: "Split the 4,000 rupees Sunita bill into 2 shares of 2,000 rupees each for you and Amit. Payment links are ready."**

[1:10 - 1:45] Scene 3: LLM Reasoning & Annual Insights Engine

[ON SCREEN]: *Hover cursor over the Executive Command Center HUD atop the page.*

"Beyond daily micro-tasks, Hisaab brings macro-level intelligence using LLM reasoning over raw yearly SQLite data."

■■ **YOU SPEAK:** *"Alexa, what is my household summary for the year?"*

■ **ALEXA REPLIES: "You spent 3.9 Lakhs on household help this year. Sunita took the most leave in May, and Ramesh had the best attendance."**

[1:45 - 2:30] Scene 4: Amazon Pay Fixed Overheads & Total Household Burn

[ON SCREEN]: *Click the 'Bills & EMIs (Amazon Pay)' category tab. Click 'Pay via Amazon Pay' on iPhone EMI card to reveal the QR code.*

"Next, we integrated fixed commitments—like phone EMIs, rent, and electricity—directly into the Amazon Pay hub."

■■ **YOU SPEAK:** *"Alexa, any bills due in 15 days?"*

■ **ALEXA REPLIES: "You have 2 payments due in the next 15 days: Flat Rent & Society of 22,000 rupees; iPhone 16 Pro EMI of 4,200 rupees via Amazon Pay ICICI Card AutoPay."**

■ **ALEXA REPLIES: ""It predicts commitments across calendar month boundaries. We can pay in one click via Amazon Pay, or ask the holy grail question...""**

[2:10 - 2:30] Scene 4 (Cont.): The Ultimate Total Household Burn & Liquidity Advisory

[ON SCREEN]: *Show the Executive HUD Total Monthly Burn number (Rs. 37,526) and green Liquidity Buffer bar.*

■■ **YOU SPEAK:** *"Alexa, what is my total household burn this month?"*

■ **ALEXA REPLIES: "Your total household burn this month is 37,526 rupees. That includes 8,477 rupees for domestic staff and daily supplies, and 29,049 rupees across 4 fixed EMIs and bills. Keep at least 10,000 rupees liquid before Friday."**

[2:30 - 3:00] Scene 5: Worker Dignity, Architecture & Winning Closing

[ON SCREEN]: *Click 'WhatsApp Slip' on Sunita's card (briefly show the breakdown), then scroll down to MCP JSON-RPC Inspector and terminal showing 12 passed tests.*

"For domestic staff, Hisaab sends respectful, bilingual WhatsApp slips with QR codes so non-literate workers have complete financial dignity."

"Under the hood, Hisaab runs on pure open standards: FastMCP over Streamable HTTP, an ACID SQLite ledger, procedural Web Audio chimes, and 12 passing unit tests with 100% test coverage."

"Hisaab turns household financial chaos into ambient peace of mind. Thank you!"

QUICK RECORDING TIPS:

- **Aspect Ratio:** Keep your browser maximized in PC layout (16:9 widescreen).
- **Audio Pause:** When you speak to Alexa, wait ~1 second for the soothing thought chord before she replies.
- **Hotkeys:** Press **Win + Alt + R** (Xbox Game Bar) or **Win + Shift + S** (Snipping Tool Video) to record.
